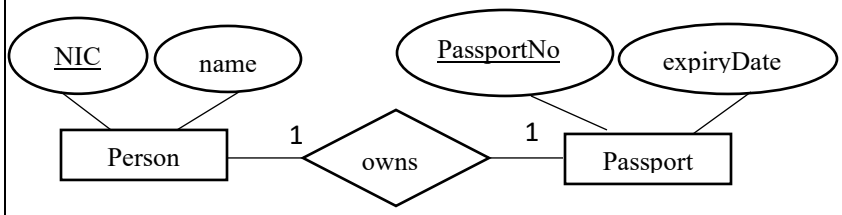
IT2140 - Database Design and Development

Lecture 05 Handout

Entitites and attributes	
1. Entity  	Student table
2. simple attributes  	Student (name,age, gender)
3. keys  	Student (<u>studentID</u>, NIC, name, age, gender)
4. Composite attributes  	Student (<u>studentID</u>, NIC, name, age, gender, street,city)
5. Multivalued attributes  	Student (<u>studentID</u>, NIC, name, age, gender, street,city) Student_phone (<u>studentID, phone</u>)



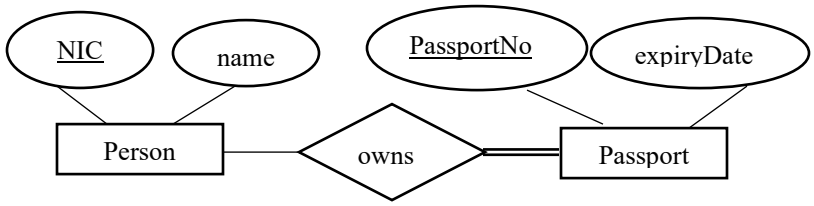
Person (NIC, name)

Passport (passportNo, expiryDate,NIC)

Or

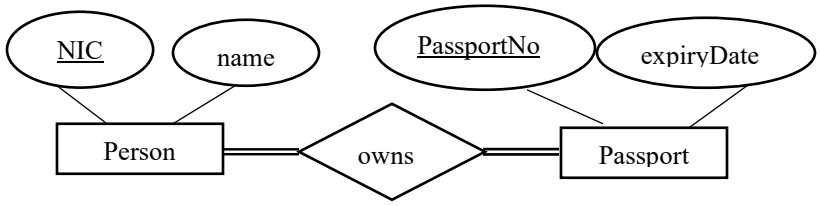
Person (NIC, name, passportNo)

Passport (PassportNo, expiryDate)

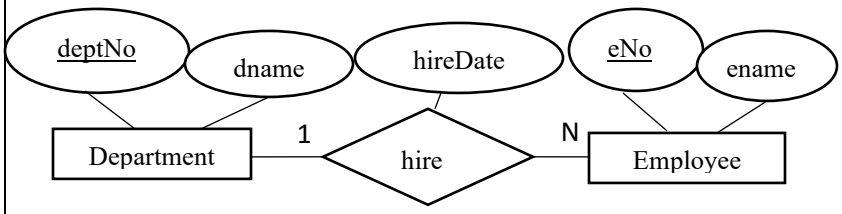


Person (NIC, name)

Passport (passportNo, expiryDate,NIC)

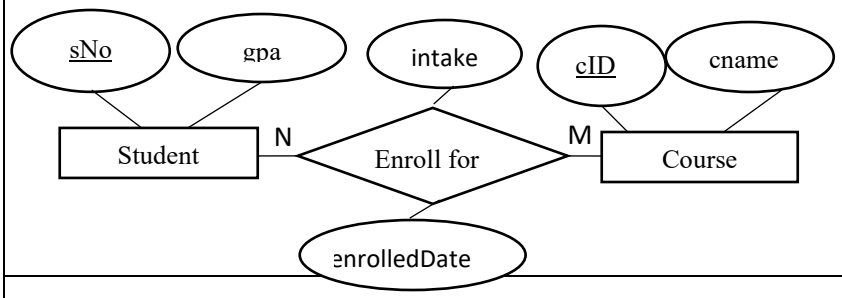


Person_passport(NIC, name, passportNo, ppExpiryDate)



Department(deptNo, dname)

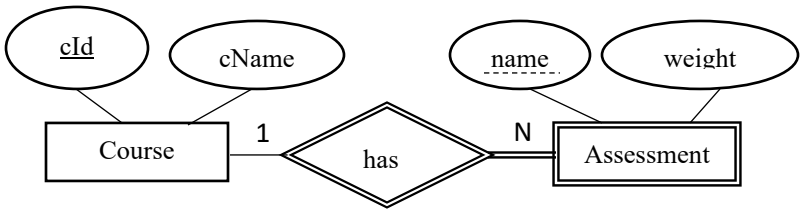
Employee(eNo, ename, deptNo,hireDate)



Student (sNo, gpa)

EnrollFor (sNo,cID, intake, enrolledDate)

Course (cID, cname)



Course (cId, cName)

Assessment (cId, name,weight)
